Town of North Hempstead Approved Street Tree List

The attached document is a list of tree species approved by the Town for planting in the Tree Lawn/public right-of-way adjacent to sidewalks. For purposes of Town initiated plantings, the preferred street tree list shall be effective January 1, 2024. The Town shall update the approved list as necessary.

The following trees, as well as any additional tree designated by the NYS Department of Transportation as a "NY Invasive Tree" is neither suitable nor desirable for planting in the Town:

- Norway Maple
- Tree of Heaven
- Russian Olive
- Smooth Buckthorn
- Black Locust

It is the policy of the Town to: (a) plant the right tree in the right place, taking into consideration site conditions and/or other relevant factors in or near the proposed tree planting area; and (b) focus on planting native trees with a goal towards diversity of species.
